Preface

Vocabulary from Classical Roots encourages you to look at words as members of families in the way astronomers see stars as parts of constellations. Here you will become acquainted with constellations of words descended from Greek and Latin, visible in families that cluster around such subjects as the human being, kinds of mental activity, and aspects of daily life.

You will notice that Latin and Greek forms appear as complete words, not as fragments. Some alliances in word families are easily recognizable, but others may seem strange without your seeing the complete sequence of forms. Some Latin nouns are consistent, like *femina*, “woman,” and *manus*, “hand,” but others shift according to the way they are used in Latin sentences: *cor*, *cordis*, “heart,” and *rex*, *regis*, “king.” The principal parts of the verb “to love” are similar in form: *amo*, *amare*, *amavi*, *amatum*. But this regularity disappears in the verb “to bear”: *fero*, *ferre*, *tuli*, *latum*. If you didn’t know that these forms belong to one verb, would you believe that the English words *conference* and *relationship* belong to the same family?

This book can do more than increase your recognition of words; perhaps it will encourage you to study Latin or Greek. More immediately, though, it can remind you that English is a metaphorical language. By returning to the origins of English words you will move closer to knowing how language began: in naming people, things, and concrete actions. So enjoy visualizing the life behind the words you use every day, descendants of Latin and Greek, seeming almost as numerous as stars.

5. **Nota Bene.** *Nota bene* means “note well” and is usually abbreviated to *N.B.* In *Vocabulary from Classical Roots*, *NOTA BENE* calls your attention informally to other words related to the theme of the lesson.
6. **Exercises.** The exercises help you determine how well you have learned the words in each lesson while also serving as practice for examinations such as the SAT: synonyms and antonyms, analogies, and sentence completions. Further exercises illustrate words used in sentences, test recognition of roots, and offer writing practice.

PART ONE

Who Am I?

LESSONS 1 AND 2

The Person

Directions

1. Determine how the Latin or Greek root is related in meaning and spelling to each defined—KEY—word that follows it.
2. Learn the pronunciation and definition(s) of each KEY word, and notice how the words are used in sentences.
3. Practice using the varied forms of KEY words.
4. Build your knowledge with all the information given: Latin mottoes, Familiar Words, Challenge Words, and Nota Bene references.
5. Complete the exercises.
